

ABOUT CURIOSITY KIDS

Curiosity Kids is an award winning enrichment programme where children attend a weekly class to explore the world around them. Every child performs hands on activities with the guidance of our staff making learning effective and fun. Our ideology is to ensure every child gets to explore, understand and enjoy learning.. We also explain how these topics come into use in our daily life activities, which makes children better understand how the world around them works. With presence in Hong Kong, Singapore and India, Curiosity Kids focuses on delivering high quality enrichment programmes for children.

CURIOSITY KIDS FOCUSES ON FOUR Cs!

CURIOSITY

Children are born with natural curiosity, it is important to foster it

CREATIVITY

Children are encouraged to be creative to explore the world around them

CONFIDENCE

Children are encouraged to share observations and ask questions to enhance confidence

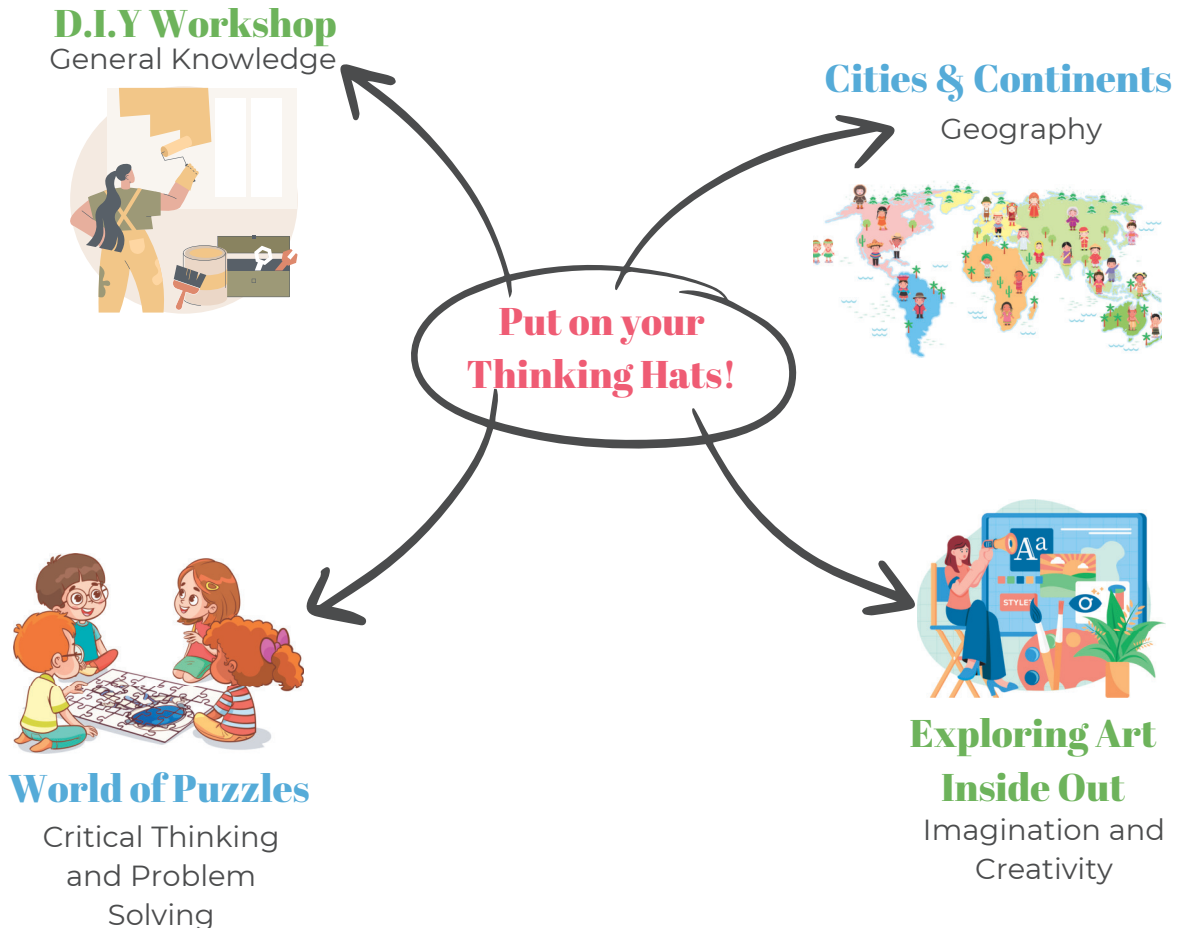

COMMUNICATION

Children improve communication skills by participating in discussions

Thinking Hats Programme

Thinking hats programme is a general knowledge enrichment where children will learn interesting facts over a diverse range of topics

Why choose us?

We strive to foster curiosity through exciting age appropriate educational topics. Our programme will include:

- Hands on activities and worksheets to reinforce learning
- Activities to challenge the mind, to build confidence and encourage creativity & imagination
- Sensorial learning and fine motor skills
- Sharing of observations to boost communication skills

D.I.Y Workshop

This is an exciting topic where children get their hands on making a variety of stuff. Its a combination of learning how to make something to then putting their learning to use. This topic will focus on enhancing their creativity and imagination!

Examples of things made in DIY workshops are : **Perfume Making, Bath Bomb Making, Toy Making** and much more

Cities & Continents

In this topic children will learn about different cities & continents. They will design simple maps as an introduction to map reading (real life skill). They will explore the **Flora and Fauna, weather, food, culture** and much more of these cities.

Its an around the world tour !

World of Puzzles

This topic will explore various styles of age appropriate puzzles and solve them in an exciting manner. They may be group puzzles to develop social skills or individual puzzles to give everyone a chance to solve them. Solving puzzles helps in critical thinking and problem solving - a life long skill.

Puzzles styles explored will be : **Pattern Puzzles, Tangram, Sudoku, Jigsaw Puzzles** and many more

Each puzzle form will be explored through fun and interactive activities to keep the curiosity going !

Exploring Art, Inside Out

Children will be able to visualize and conceptualize concepts i.e symmetry, shapes etc by designing their art work. We will be exploring various traditional art forms in this topic This topic will encourage children to get creative as they unleash their imagination

Examples of Art forms covered will be : **Batik, Block Print, Mandala Art** etc.
